Soil Dynamics and Earthquake Engineering 25 (2005) I–V

SOIL DYNAMICS AND EARTHQUAKE ENGINEERING

www.elsevier.com/locate/soildyn

Contents of Volume 25

Number 1

Evaluation of lateral spreading using artificial neural networks 1
M. H. BAZIAR & A. GHORBANI (Iran)

Response spectral attenuation relationships for Sumatran-subduction earthquakes and the seismic hazard implications to Singapore and Kuala Lumpur 11
K. MEGAWATI (China), T.-C. PAN (Singapore) & K. KOKETSU (Japan)

Numerical study of characteristics of underground blast induced surface ground motion and their effect on above-ground structures. Part I. Ground motion characteristics 27
C. WU & H. HAO (Australia)

Numerical study of characteristics of underground blast induced surface ground motion and their effect on above-ground structures. Part II. Effects on structural responses 39
H. HAO & C. WU (Australia)

Energy-based probabilistic evaluation of soil liquefaction 55
Y. R. CHEN, S. C. HSIEH, J. W. CHEN & C. C. SHIH (Taiwan, ROC)

Simultaneous identification of time and space variant dynamic soil properties during the 1995 Hyogoken-Nanbu earthquake 69
A. MIKAMI & T. SAWADA (Japan)

Number 2

Study on methodology for running safety assessment of trains in seismic design of railway structures 79
X. LUO (Japan)

Processing of strong-motion accelerograms: needs, options and consequences 93
D. M. BOORE (USA) & J. J. BOMMER (UK)

Centrifuge modeling of the behavior of caisson-type quay walls during earthquakes 117
C.-J. LEE (Taiwan, ROC)

Evaluation of seismic site factors in the Mississippi Embayment. I. Estimation of dynamic properties 133
D. PARK & Y. M. A. HASHASH (USA)

Evaluation of seismic site factors in the Mississippi Embayment. II. Probabilistic seismic hazard analysis with nonlinear site effects 145
D. PARK & Y. M. A. HASHASH (USA)

Shear moduli of volcanic soils 157
T. SAHAPHOL & S. MIURA (Japan)

Shear wave velocity modelling in crustal rock for seismic hazard analysis 167
A. M. CHANDLER (China), N. T. K. LAM (Australia) & H. H. TSANG (China)

Number 3

Late resonant response at Wainuiomata, New Zealand, during distant earthquakes 187
W. R. (BILL) STEPHENSON (New Zealand)

Effect of tilt on strong motion data processing 197
V. M. GRAIZER (USA)

The reflection of plane waves in a poroelastic half-space saturated with inviscid fluid 205
C.-H. LIN, V. W. LEE & M. D. TRIFUNAC (USA)

Assessment of liquefaction potential based on peak ground motion parameters 225
R. P. ORENSE (Japan)

Nonlinear identification of the soil response at Dahan downhole array site during the 1999 Chi–Chi earthquake 241
O. PAVLENKO (Russia Federation) & C.-H. LOH (Taiwan, ROC)

Analysis of a highway embankment failure associated with the 1999 Düzce, Turkey earthquake 251
B. S. BAKİR & E. AKİ (Turkery)

Number 4

Ambient noise horizontal-to-vertical spectral ratio in site effects estimation and correlation with seismic damage distribution in urban environment: the case of the city of Thessaloniki (Northern Greece) 261
A. A. PANOU, N. THEODULIDIS, P. HATZIDIMITRIOU, K. STYLIANIDIS & C. B. PAPAZACHOS (Greece)

A comparative study of buried structure in soil subjected to blast load using 2D and 3D numerical simulations 275
Y. LU, Z. WANG & K. CHONG (Singapore)

A 3D BEM-FEM methodology for simulation of high speed train induced vibrations 289
J. O'BRIEN & D. C. RIZOS (USA)

Parametric analysis of the seismic response of a 2D sedimentary valley: implications for code implementations of complex site effects 303
K. MAKRA (Greece), F. J. CHÁVEZ-GARCÍA (México), D. RAPTAKIS & K. PITILAKIS (Greece)

Sensitivity of PSHA results to ground motion prediction relations and logic-tree weights 317
F. SABETTA, A. LUCANTONI (Italy), H. BUNGUM (Norway) & J. J. BOMMER (UK)

Computation of response spectra from mining tremors using neural networks 331
K. KUŹNIAR, E. MACIĄG & Z. WASZCZYSZYN (Poland)

Number 5

Influence of seismic cyclic loading history on small strain shear modulus of saturated sands 341
Y.-G. ZHOU & Y.-M. CHEN (China)

Efficient analysis of pile-group effect on seismic stiffness and strength design of buildings 355
I. TAKEWAKI & A. KISHIDA (Japan)

Three-dimensional liquefaction potential analysis using geostatistical interpolation 369
K. M. DAWSON & L. G. BAISE (USA)

Seismic microzoning from synthetic ground motion parameters: case study, Santiago de Cuba 383
L. ALVAREZ (Cuba), F. VACCARI, G. F. PANZA (Italy) & R. PICO (Cuba)

Estimating severity of liquefaction-induced damage near foundation 403
C. H. JUANG, H. YUAN, D. K. LI, S. H. YANG & R. A. CHRISTOPHER (USA)

Number 6

On publication rates in earthquake engineering 413
M. D. TRIFUNAC (USA)

Transient mechanical wave propagation in semi-infinite porous media using a finite element approach 421
A. MESGOUEZ, G. LEFEUVE-MESGOUEZ & A. CHAMBAREL (France)

An identification procedure of soil profile characteristics from two free field acclerometer records 431
Z. HARICHANE, H. AFRA & S. M. ELACHACHI (Algeria)

Empirical models for estimating liquefaction-induced lateral spread displacement 439
J. ZHANG & J. X. ZHAO (New Zealand)

Evaluation of seismic displacements of quay walls 451
S.-R. KIM, I.-S. JANG, C.-K. CHUNG & M.-M. KIM (South Korea)

Correlation of shear wave velocity with liquefaction resistance based on laboratory tests 461
C. YUNMIN, K. HAN & C. REN-PENG (China)

Numbers 7–10

11th International Conference on Soil Dynamics and Earthquake Engineering (ECSDEE): Part I

A selection of papers from the joint conference of 11th ICSDEE and third International Conference on Earthquake Geotechnical Engineering (ICEGE), University of California, Berkeley, 7–9 January 2004

Preface 471
T. NOGAMI, A. R. ANANDARAJAH & A. ELGAMAL, I. TOWHATA (Singapure)

Assessment of seismic risk in Tashkent, Uzbekistan and Bishkek, Kyrgyz Republic . . 473
M. ERDIK (Turkey), T. RASHIDOV (Uzbekistan), E. SAFAK (USA) & A. TURDUKULOV (Kyrgyzstan)

Simulation of seismic response in a city-like environment. 487
J.-P. GROBY (France), C. TSOGKA (USA) & A. WIRGIN (France)

A study on the duration and amplitude characteristics of earthquake ground motions . . 505
Y. SHOJI, K. TANII & M. KAMIYAMA (Japan)

Wave propagation and soil–structure interaction on a cliff crest during the 1999 Athens Earthquake. 513
D. ASSIMAKI, E. KAUSEL (USA) & G. GAZETAS (Greece)

Seismic wave amplification: Basin geometry vs soil layering 529
J. F. SEMBLAT, M. KHAM, E. PARARA, P. Y. BARD (France), K. PITILAKIS, K. MAKRA & D. RAPTAKIS (Greece)

Case study of strong ground motion variations across cut slope 539
J. P. STEWART & S. E. SHOLTIS (USA)

Numerical evaluation of slope topography effects on seismic ground motion 547
G. D. BOUCKOVALAS & A. G. PAPADIMITRIOU (Greece)

Data archives of seismic fault-induced damage. 559
K. KONAGAI (Japan)

Seismic upgrade of hydraulic fill dam by buttressing 571
L. H. MEJIA, J. I. SUN & K. K. LEUNG (USA)

Structural and geotechnical impacts of surface rupture on highway structures during recent earthquakes in Turkey 581
A. PAMUK, E. KALKAN & H. I. LING (USA)

Characterizing frictional behavior for use in predicting the seismic response of unattached equipment 591
S. RAY CHAUDHURI & T. C. HUTCHINSON (USA)

International standard (ISO) on seismic actions for designing geotechnical works–An overview 605
S. IAI (Japan)

Response of three Athens metro underground structures in the 1999 Parnitha earthquake 617
G. GAZETAS, N. GEROLYMOS & I. ANASTASOPOULOS (Greece)

Dynamic theory of rigid-plasticity 635
M. Enoki, B. X. Luong, N. Okabe & K. Itou (Japan)

A method for nonlinear dynamic response analysis of semi-infinite foundation soil. . . 649
C. K. Lee, H. Shiojiri, K. Hanada & T. T. Nakagawa (Japan)

Dyadic wavelet analysis of PDA signals 661
J. DUAN & I. S. OWEIS (USA)

A new method for formulation of dynamic responses of shallow foundations in simple general form 679
T. NOGAMI, A. A. MAHBUB & S. H. CHEN (Singapore)

H-adaptivity applied to liquefiable soil in nonlinear analysis of soil–pile interaction . . 689
X. TANG & T. SATO (Japan)

Reduction of ground vibration by means of barriers or soil improvement along a railway track 701
L. ANDERSEN & S. R. K. NIELSEN (Denmark)

Study of SSI and non-uniform ground motion effect on pounding between bridge girders 717
N. CHOUW & H. HAO (Australia)

Effects of spatially variable ground motions on the seismic response of a skewed, multi-span, RC highway bridge 729
L. LOU & A. ZERVA (USA)

Bound of earthquake input energy to soil–structure interaction systems. 741
I. TAKEWAKI (Japan)

Effects of inertial and kinematic interaction on seismic behavior of pile with embedded foundation 753
K. TOKIMATSU, H. SUZUKI & M. SATO (Japan)

Calibration of dynamic analysis methods from field test data 763
A. ANANDARAJAH, J. ZHANG & C. EALY (USA)

Centrifuge modeling of load-deformation behavior of rocking shallow foundations. . . 773
S. GAJAN, B. L. KUTTER, J. D. PHALEN, T. C. HUTCHINSON & G. R. MARTIN (USA)

Seismic soil pressure for building walls: An updated approach. 785
F. OSTADAN (USA)

Seismic earth pressures on rigid and flexible retaining walls. 795
P. N. PSARROPOULOS (Greece), G. KLONARIS (USA) & G. GAZETAS (Greece)

Number 11

Liquefaction-induced large displacement of pile-supported wharf 811
A. TAKAHASHI & J. TAKEMURA

Diffraction of seismic waves in an elastic, cracked halfplane using a boundary integral formulation 827
A. RODRÍGUEZ-CASTELLANOS, F. LUZÓN & F. SÁNCHEZ-SESMA

Local and global shape functions in a boundary element formulation for the calculation of traffic induced vibrations 839
S. FRANÇOIS, G. LOMBAERT & G. DEGRANDE

A continuum damage concrete model for earthquake analysis of concrete gravity dam–reservoir systems 857
Y. CALAYIR & M. KARATON

3D configuration of Mygdonian basin and preliminary estimate of its site response 871
D. G. RAPTAKIS, M. V. MANAKOU, F. J. CHVEZ-GARCA, K. A. MAKRA & K. D. PITILAKIS

Discussion of the paper 'An empirical attenuation relationship for Northwestern Turkey ground motion using a random effects approach' 889
P. GÜLKAN (Trukey) & E. KALKAN (USA)

Number 12

Stress fields of a half-plane caused by moving loads-resolved using doublet mechanics 893
S.-S. LIN & Y.-C. SHEN (Taiwan, ROC)

Diagnosis and prediction of vibration from railway trains 905
B. PICOUX & D. LE HOUÉDEC (France)

Correlation of cyclic preloading with the liquefaction resistance 923
T. WICHTMANN, A. NIEMUNIS, T. TRIANTAFYLLIDIS (Germany) & M. POBLETE (Chile)

The role of the seismic trigger in the Calitri landslide (Italy): historical reconstruction and dynamic analysis 933
S. MARTINO & G. S. MUGNOZZA (Italy)

Vibrations of square and circular foundations with concentric openings on elastic half space 951
D. KARABALIS (Greece) & C.-F. D. HUANG (USA)

Strain accumulation in sand due to cyclic loading: drained triaxial tests 967
T. WICHTMANN, A. NIEMUNIS & T. TRIANTAFYLLIDIS (Germany)

Scattering of plane SV waves by cylindrical canyons in saturated porous medium 981
L. WEIHUA & Z. CHENGGANG (China)

Scattering of plane P waves by circular-arc alluvial valleys with saturated soil deposits 997
L. WEIHUA, Z. CHENGGANG (China) & S. PEIXIN (USA)

Response to the discussion: Discussion of the paper ''An empirical attenuation relationship for northwestern Turkey ground motion using a random effects approach'' 1015
C. ÖZBEY & A. SARI (USA)
